If our service is connected, tracking is carried out on the server side. This means that the tracking URLs are accessed from the IP address of the RMS ad server. This can cause differences in the view count, as some ad servers on the agency or client side filter and discard views from a single IP.

## Necessary elements

- Audio ad
- Tracking link (if tracking is required)

### Important:

Please send the adverts to [werbemitteldigital@rms.de](mailto:werbemitteldigital@rms.de) at least two working days prior to the start of the campaign
